

Web-based, Dynamic Failure Analysis Tool

A direct path to Product / Process Improvement and Customer Satisfaction.

A new generation of Failure Reporting, Analysis and Corrective Action System (FRACAS) that captures information about equipment or the processes in supply or repair.

FavoWeb™ is an integrating tool which enables any organization engaged in design, manufacture, operation or maintenance of complex equipment to close the visibility and action loop with product failures, process hiccups, suppliers quality and customer suggestions – an essential part of the organizational knowledge base supporting quality, reliability and responsiveness – important discriminators in market success.

FavoWeb™ - the Failure Reporting and Analysis software developed by FavoWeb Ltd., a member of A.L.D. Group encompasses 20 years of A.L.D.'s FRACAS development experience for the FRACAS customers around the world.

FavoWeb™ is the failure/event reporting and processing software for any phase of a product/service life cycle in the wide range of industries.

FavoWeb™ makes the adaptation to any phase (design, manufacturing, O&M, etc) and industry (aircraft, defense, telecommunication, home appliances, etc') easy and logical.

FavoWeb™ introduces the “cutting edge” technologies – World Wide Web and Intranet to a failure/event reporting system – no need in the endless forms and Excel sheets. The collected data is accessible throughout the organization/industry/world.

FavoWeb™ Design Ensures:

- Applicability to any phase of a product life cycle: from design to maintenance
- Applicability to the wide range of industries and systemic processes
- Easy Setup and Adaptation
- Customer-tailored data fields and functions
- Intranet / Internet accessibility
- Combination of easy data collection with on-line visibility for on-line analysis

Sonol Tower, 52 Menachem Begin Road , Tel Aviv, 67137, Israel

The Highest Link in FRACAS Evolution

FavoWeb™ Functionality:

- Failure/Event Data Collection
- Test Results Recording
- Data Analysis According to the User-Defined Criteria
- Corrective Actions Recommendation and Analysis
- Calculations & Statistics: MTBF, MTBCF, MTTR, MTBMA, MDT, Availability
- Output Reports
- System Administration
- World Wide Web and Intranet Capabilities
- FavoWeb uses LDAP protocol to enhance data security
- Export/Import - MS Access, Excel, HTML, Oracle, Text, ASCII
- Hands-Free Reporting (prototype)
- Customer Complaints and Satisfaction

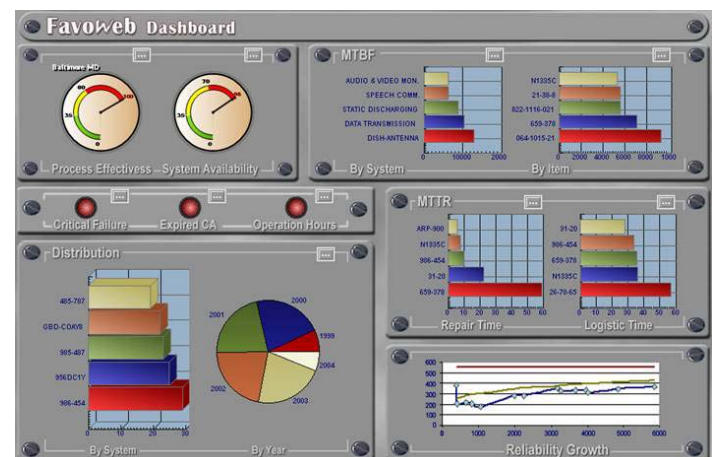

- Notification Flow Generator: controls the flow of FRACAS and Corrective Actions process;
- PDA reporter: software solution for reporting failures / events / activities through I-PAQ PDA based on Windows CE OS;
- Dashboard: adjustable dashboard for the display of top management reports;
- Voice-activated Failure Reporting: prototype of the hands-free reporting based on the patented approach utilizing speech recognition

FavoWeb™ takes important data from the manual realm of intuitive judgment and makes it available to people who need it, without the disproportionate expense of the in-house FRACAS development.

FavoWeb™ answers all your organization's needs for up to date product and process health and focuses cost effective system improvement.

FavoWeb™ Modules

- Basic: Failure/Event Reporting; Product Tree; Libraries; Corrective Actions; Basic Reports; Administration Tool;
- Extended Reports: choice of 5 advanced statistical reports based on the cutting-edge industry techniques;
- Serial Number / System Traceability: tracking system history and configuration;
- Scheduled Maintenance
