## FavoWeb at ELTA serves as a cross-organization FRACAS, FRB, MRB supporting application with more than 300 users organization-wide.

ELTA Systems Group, IAI, is considered as one of the world leading companies in the defense electronic systems and products field. ELTA operates as a defense systems house based on electromagnetic sensors (Radar, Electronic Warfare and Communication) and Information Technology. ELTA Systems products are designed for Intelligence, Surveillance/ Reconnaissance, Early Warning and Control, Self-Protection/Self-Defense, Target Acquisition and Fire Control applications. The Group's products include components and subassemblies designed and produced in-house.

ELTA offers comprehensive solutions, products and systems tailored to the special requirements of customers and users, and thereby constitute a competitive advantage vis-à-vis the leading defense firms in the world. The Group holds a variety of unique technological centers, as well as exclusive facilities and national infrastructures (http://www.iai.co.il/site/en/iai.asp?pi=17887)

ELTA embedded FavoWeb's FRACAS through out all its activities: from production floors like Metal Processing center and Microwave assembly center, to Projects and Product licensing. ELTA also uses FavoWeb's integration ability, and created several interfaces between other legacy systems and FavoWeb. The product information is extracted when needed from IMAN – ELTA's Product Data Management system.

In Production, Production Station Form automatically filled in through an online connection to the MRP Legacy system database. Additional organizational data such as projects, lists of employees and even financial data is imported to FavoWeb. FavoWeb Corrective Action module manages ELTA's MRB, FRB and IPT meetings.
